

Report- Monday

02.03.2026

On Monday, we all met at the school, I.E.S. El Rincón at 8am for our first day at a Canarian school. As they had Physics/ Chemistry, we were given a tour of the school by the vice principle, after which she presented the school and its values to us.

At 9:50am, we joined our exchange partners in their English class, where they were practicing the passive voice for an upcoming exam.

Following that was an 11 o'clock break, where we had the opportunity to

check out their cafeteria, which offered drinks, sandwiches and candy. Once the end of the break was announced via a song instead of a classic bell, our partners left for math class and we used the sunny weather to play ping-pong until the music teacher took us to her music class outside, where the students showed us a drum performance from carnival before we got there called "Batucada", which we got to try as well! Afterwards, us German students got some Frozen Yoghurt at the mall next to the school, after which we got to try some classic Canarian food the families brought.

With the lovely weather, we stayed at the school playing volleyball and UNO while our partners did homework. Our

time at the school came to a close with us putting our things at one of our

exchange partners' grandma's house and giving us an Argentinian dessert to go, before our exchange partners took us to the beach "Las Canteras" to get ice cream, by which time it was already 5pm. While most of our partners stayed behind, the rest of us walked to the northern tip of the beach, where the sun was starting to set. We took pictures and headed back at around 7 pm, stopping at the souvenir shop before getting our things and going our separate ways.
