

# Tagesbericht vom 07.05.2026

On Thursday the 7th may our day started at 8:30 a.m. We left the school together and travelled by minibus to the vineyards in Criação Velha on Pico Island. There, we were able to admire the beautiful landscape, the unique vineyards of the island, and an old windmill.

After that, we had some free time in Madalena until lunchtime. During this time, we could explore the town and buy souvenirs. At lunchtime, we all met in a restaurant where we had lunch together.

After lunch, we travelled by bus to the whale watching station. First, we listened to a short presentation about the different whales and other sea animals that we might be able to see. We also received some important safety instructions for the boat trip. Afterwards, we were given jackets and life vests before getting onto the boat.

Soon after leaving the harbour, we headed out to sea. Although the weather was very windy and there were many strong waves, the boat trip was still an amazing experience. During the tour, we saw two small whales, a turtle, and several dolphins. For many of us, this was definitely the highlight of the day.

At the end of the excursion, we returned back to shore after having a very exciting and memorable day together.
